MARKS an EPOCH in the HISTORY of ARTIFICIAL LIMBS

MARKS' PATENTS from 1854 to 1895 cover all the accredited improvements in artificial legs and arms, and make the Marks' artificial limbs peerless. Rubber feet remove jar and make the stump-bearings easy. Rubber hands extend the limits of accommodations.

Light, Durable, Practical. Do not get out of order, are inexpensive to wear. Appreciated by over thirty-six thousand wearers. Forty-six highest awards granted by Industrial Expositions.

Appointed by U. S. Government, railroad companies and other large corporations to furnish artificial limbs to pensioners and employees.

The limits of the utility of Marks' artificial limbs are unbounded. Persons wearing them engage in every occupation and profession.

A conductor on an Eastern railroad wears an artifical arm with rubber hand. He holds tickets between his rubber finger and thumb while he punches them with his natural hand.

A farmer in the Southern States writes that he can pick as much cotton and saw as much wood in a day as any one.

A signal man in the employ of a large railroad wears one artificial leg, and attends to his duties in an acceptable manner

Send for **Manual of Artificial Limbs,** containing 432 pages, with 724 cuts. Instructions are given how to take measurements and obtain artificial limbs without leaving home.

The City Directory is the most effective and most economical method of reaching all the people all the time. Those who buy without looking at the classified list of those who sell do themselves great injustice. The classified lists in the Business Directory form the best Buyers' Guide on earth. A modern up-to-date method of getting what you want.
